ABOUT US

Company Overview

Delta Engineering & Technology is a leading **Engineering & Technology System Integrator** dedicated to delivering innovative, reliable, and sustainable engineering solutions for industrial, commercial, marine, and infrastructure sectors across Bangladesh.

Founded with a vision to bridge engineering excellence with advanced technology, we provide comprehensive solutions encompassing **Power Systems, Industrial Automation, IT Infrastructure, Renewable Energy, Fire Safety, Testing & Commissioning, Marine Communication, and Professional Engineering Training**. From initial consultation and engineering design to system integration, installation, commissioning, maintenance, and technical support, we deliver end-to-end turnkey solutions tailored to our clients' operational needs.

Our multidisciplinary team of experienced engineers and technology professionals combines deep industry expertise with internationally recognized engineering practices to ensure every project meets the highest standards of quality, safety, performance, and reliability.

At Delta Engineering & Technology, we believe engineering is more than installing equipment—it is about solving complex challenges, optimizing performance, and building sustainable solutions that empower industries and contribute to national development.

Whether supporting industrial facilities, manufacturing plants, commercial buildings, marine vessels, ports, government institutions, or telecommunications infrastructure, we are committed to delivering intelligent engineering solutions that create lasting value for our clients.

Mission

Our mission is to deliver integrated engineering and technology solutions that enable industries to operate safely, efficiently, and sustainably. Through engineering expertise, advanced technologies, quality products, and customer-focused services, we design, integrate, install,

commission, and support reliable systems across power, industrial automation, marine communication, IT infrastructure, renewable energy, fire safety, and professional training.

We are committed to building long-term partnerships by providing innovative solutions, technical excellence, and exceptional service that create lasting value for our clients, employees, and communities.

Vision

To become the most trusted and innovative Engineering & Technology System Integrator in Bangladesh and a recognized regional leader, delivering world-class engineering, automation, power, marine communication, and digital infrastructure solutions that empower industries, accelerate sustainable development, and shape the future of intelligent engineering.

Core Values

Engineering Excellence

We uphold the highest standards of technical competence, precision, and quality in every project we undertake.

Innovation

We continuously embrace emerging technologies and innovative engineering practices to create smarter and more efficient solutions.

Integrity

We conduct our business with honesty, transparency, accountability, and professionalism, earning the trust of our clients and partners.

Customer Commitment

We place our clients at the center of everything we do, delivering tailored solutions that exceed expectations and foster long-term partnerships.

Quality & Safety

Quality assurance and workplace safety are fundamental to every engineering process, ensuring reliable and sustainable project outcomes.

Collaboration

We believe that teamwork, knowledge sharing, and strong partnerships drive engineering success and innovation.

Continuous Learning

We invest in the professional growth of our people through ongoing education, technical training, and research to remain at the forefront of technological advancement.

Sustainability

We are committed to environmentally responsible engineering practices that contribute to a cleaner, safer, and more sustainable future.

Management Message

Welcome to **Delta Engineering & Technology**.

Engineering is constantly evolving, driven by innovation, digital transformation, and the increasing demand for sustainable solutions. At Delta Engineering & Technology, we embrace these opportunities by delivering integrated engineering and technology solutions that help industries achieve greater efficiency, reliability, and long-term success.

Our strength lies in combining technical expertise, innovative thinking, and customer-focused service to solve complex engineering challenges. Every project we undertake reflects our commitment to quality, safety, professionalism, and engineering excellence.

As we continue to grow, our vision remains clear—to become a trusted engineering partner for industries across Bangladesh and beyond by delivering intelligent solutions that create measurable value.

We sincerely thank our clients, partners, and employees for their continued trust and support. Together, we look forward to building a smarter, safer, and more sustainable future.

Chief Executive Officer (CEO)

Delta Engineering & Technology (DET)

Company Timeline

2018 — Foundation

Delta Engineering & Technology was established with the vision of becoming a trusted Engineering & Technology System Integrator in Bangladesh.

2018— Engineering Solutions

Expanded engineering services in power systems, industrial automation, electrical installations, and system integration.

2020 — IT Infrastructure

Strengthened capabilities in enterprise networking, structured cabling, CCTV surveillance, wireless networking, and cybersecurity solutions.

2023 — Professional Training

Launched the Delta Engineering Training Academy to develop skilled engineers through industry-oriented technical training and certification programs.

2024 — Marine Communication

Entered the maritime industry by providing advanced satellite communication solutions, including Starlink connectivity systems.

Future Vision

Expand operations nationwide and establish Delta Engineering & Technology as one of the leading engineering solution providers in South Asia through innovation, quality, and sustainable engineering.

Certifications

At Delta Engineering & Technology, quality, safety, and professional excellence are at the core of our operations. We are committed to complying with national regulations and internationally recognized engineering standards while continuously improving our capabilities.
